

## Stone Paper Production Opportunity

### The Opportunity

Plentiful Choices Ltd invites investors and partners to join a high-potential, eco-conscious manufacturing venture: a stone paper production line tailored for sustainable innovation. Using a proprietary formula with 70–80% calcium carbonate and non-toxic resin, this line produces durable, water-resistant, and eco-friendly paper suitable for diverse applications — from packaging and notebooks to shopping bags and containers.

### Why Stone Paper?

- Zero water use in production
- No bleach, no acid, no trees
- Photodegradable under UV, recyclable, and highly durable
- Ideal for markets seeking plastic or paper alternatives

### Why Stone Paper?

- Rapid growth in demand across GCC, Asia, and Europe
- Opportunity for local manufacturing to reduce import dependency
- Strong alignment with ESG goals and government sustainability agendas

### Investment Highlights

- CapEx Required for machinery and equipment: 1-3 M\$ (modular setup options available)
- Return Potential: Projected ROI > 3x over 5 years
- Flexible plant design tailored to local applications and output volumes

### Technical Scope

- Customizable production line for bags, labels, containers, notebooks
- Machinery and layout adaptable to regional needs
- Expertise in setup, training, and ongoing support included

### Why Partner With Us?

- UK-based green tech firm with regional project experience
- End-to-end consultancy and technical support
- Network of verified machinery suppliers and engineers
